

# LOCATION INSIGHTS

**UNDERSTAND HUMAN MOVEMENT  
AND BEHAVIOURS**

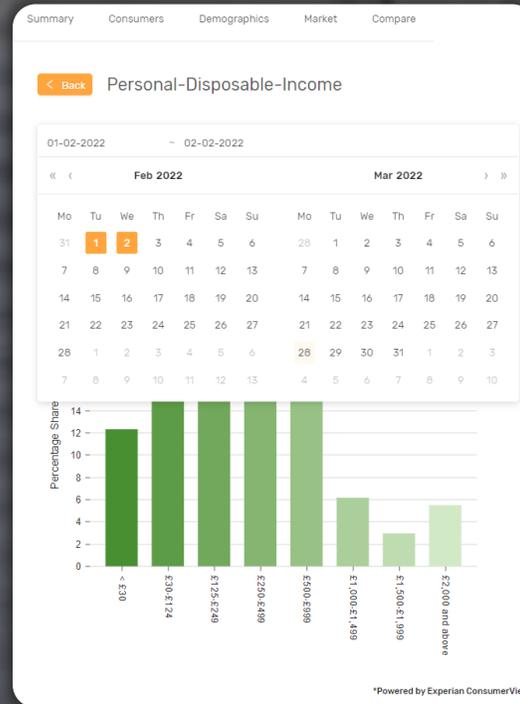

with in depth geo-location data

# IN DEPTH GEODEMOGRAPHIC PROFILING

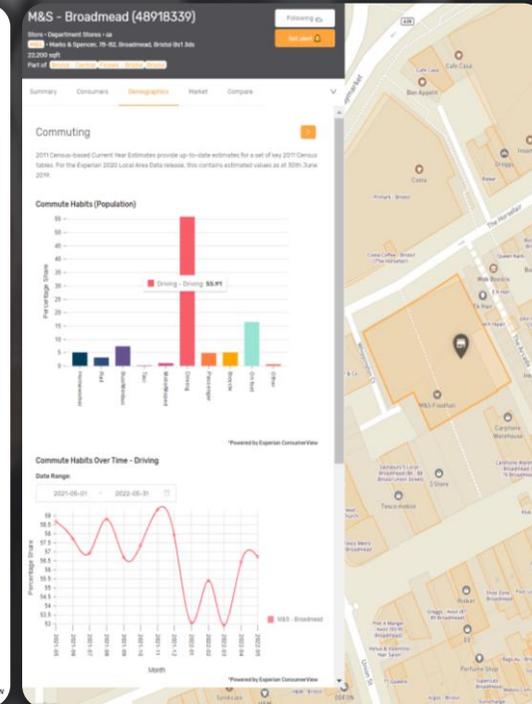

Location Insights brings demographic data to life by combining Mosaic's powerful cross-channel consumer classification system and rich demographic and spend data, with Visitor Insights market leading real-time geo-location systems.

- Transform static, residence-based demographic data into actual visitor profiles based on real life visitor catchments.
- Analyse demographic changes through a timeseries to understand how visitor profiles have changed over time.
- Add a deeper layer of insight into current market signals using near-to real time visitor profiling.

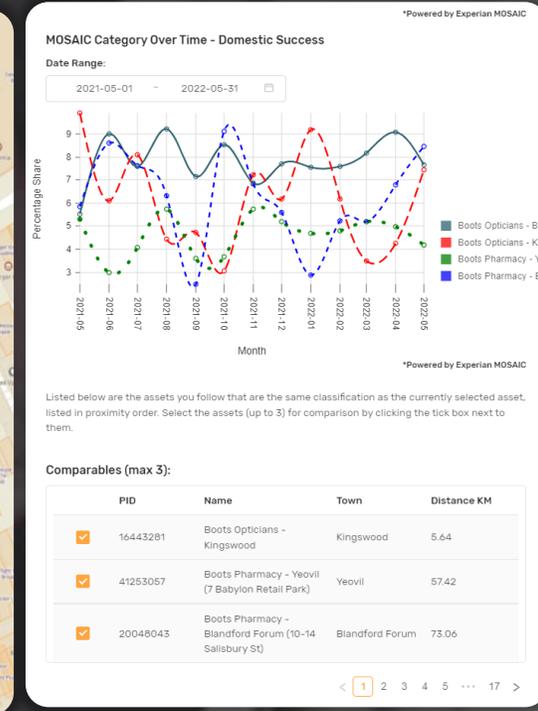

## MODEL VISITOR PROFILES:

During different days of the week, seasons, key dates and changes over time.

Specific to stores, sites, retail places, town centres, outdoor spaces...etc

Benchmarked against any other, similar or competing locations

# KEY USE CASES

## Macro and micro footfall and visitor profiling

- At store, street, retail centre, town/city centre level to create a winning site selection formula
- Regional and local tend analysis to identify the attractiveness of trade areas
- Benchmark performance against other sites, stores, assets, locations, and competitors

## Location planning and management

- Post pandemic recovery and visitor changes
- Identify the potential of local markets and assets
- Macro analysis of locations presenting growth potential
- Micro level analysis at site and street level
- Supply and demand insights
- Localised competitor analysis

## Marketing

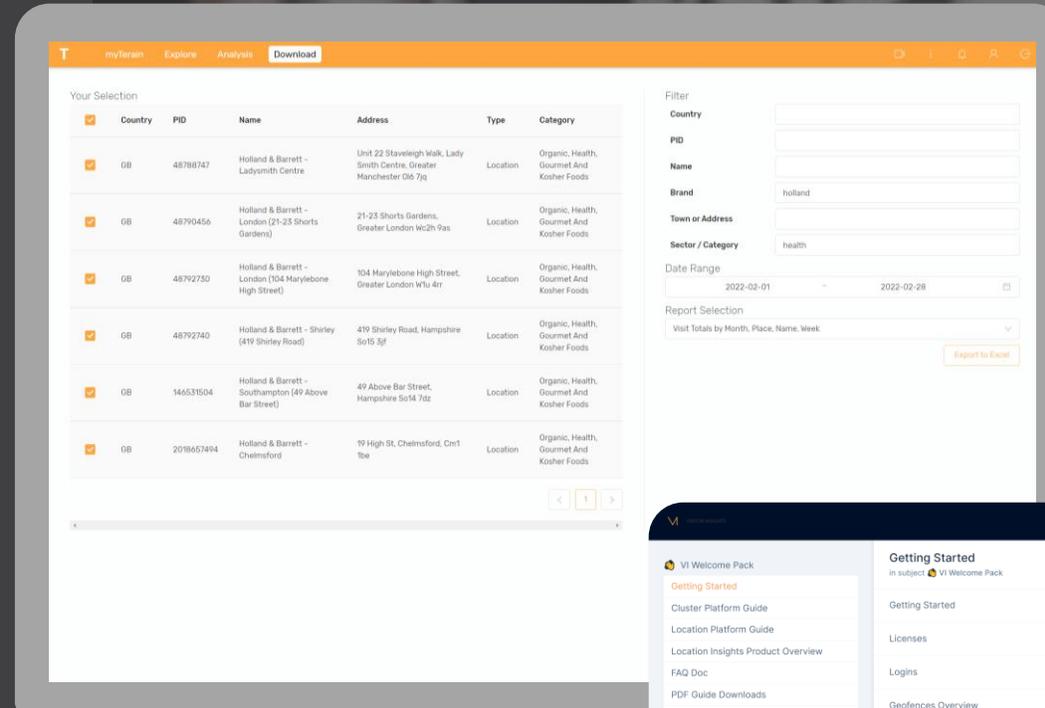

- Identify visitor profiles, changes in local populations and areas of potential growth
- Create detailed marketing impact analysis

# ACCESSING INSIGHTS

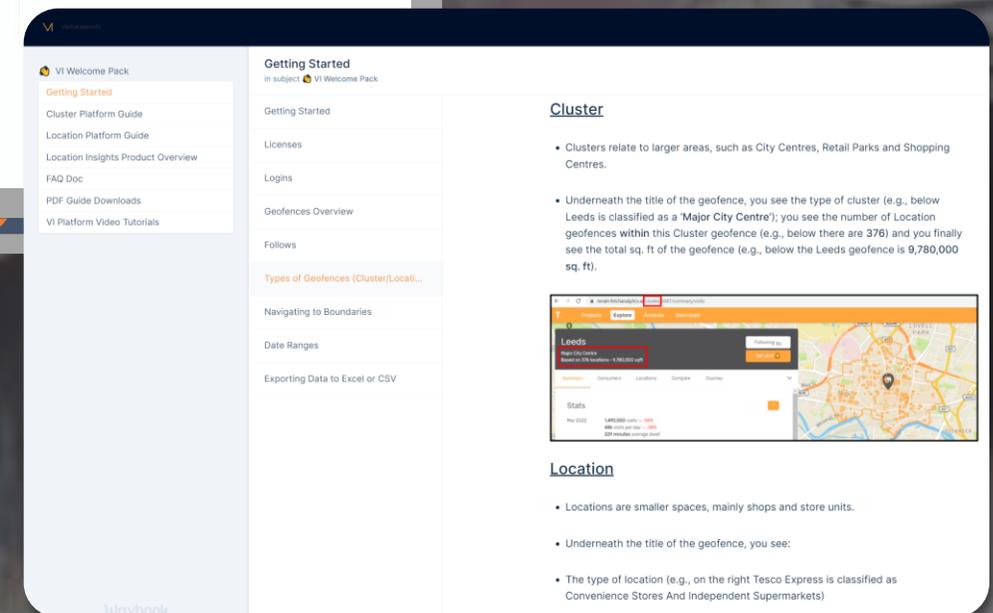

## Online self-serve platform Terain Data feeds & API

- User friendly front end system, supports both access to, analysis, and extraction of macro and micro insights
- Data feeds provide the ability to integrate with your analytics platform

## SUPPORT & SERVICE

- Dedicated account manager and analyst support
- Set up support
- Ongoing access to training, technical and insight support

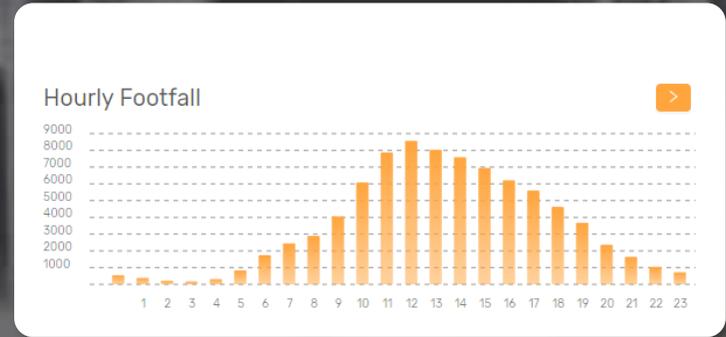

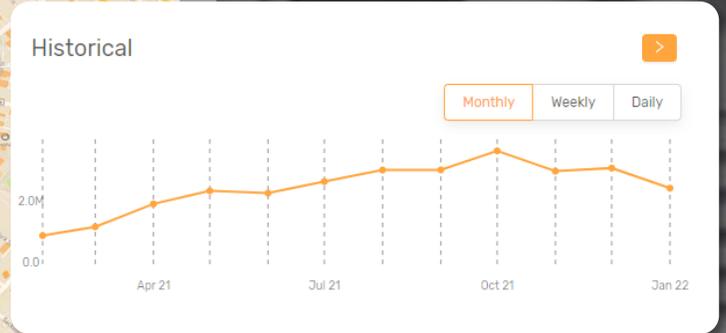

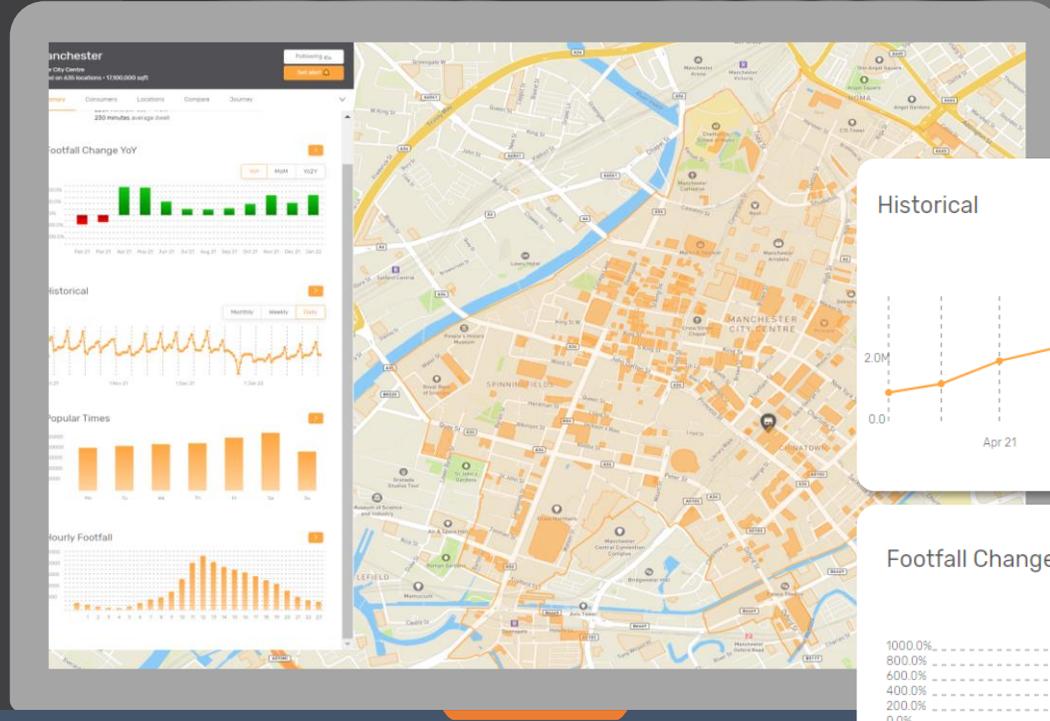

# METRICS FOOTFALL

Differentiate between whole city centres, retail cores and shopping centres as well as individual streets, buildings, stores– or custom zones

- Portfolio wide footfall
- Benchmark store performance against portfolio, competitors, and wider area

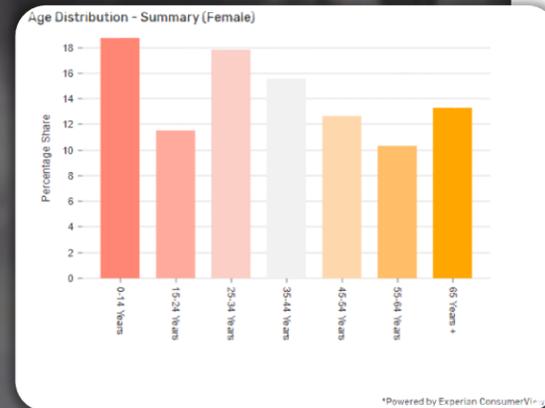

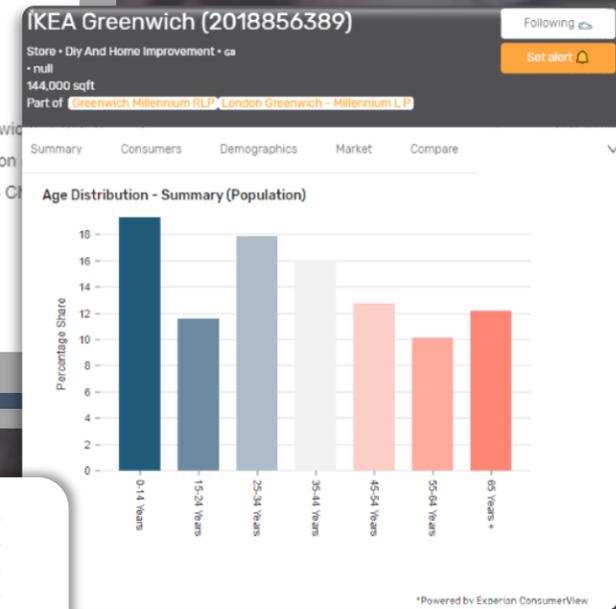

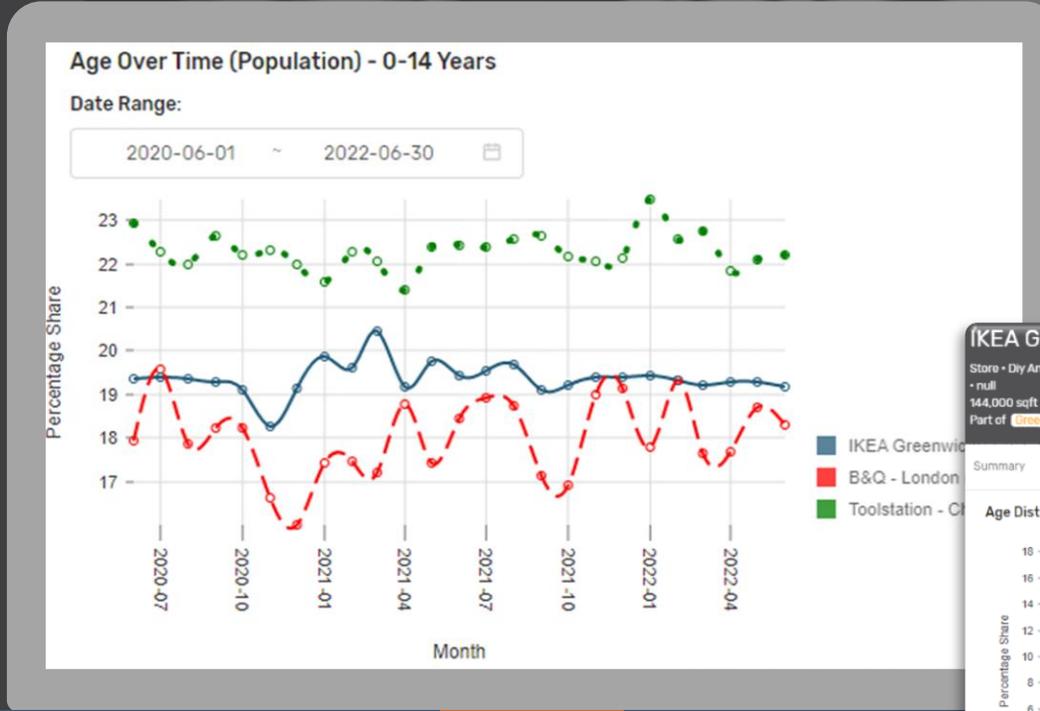

Visitor numbers by year, month, week, day, hour

- Hourly Footfall/Average Visits by Hour
- Peak footfall by hour of the day and day of the week
- Changes pre and post pandemic

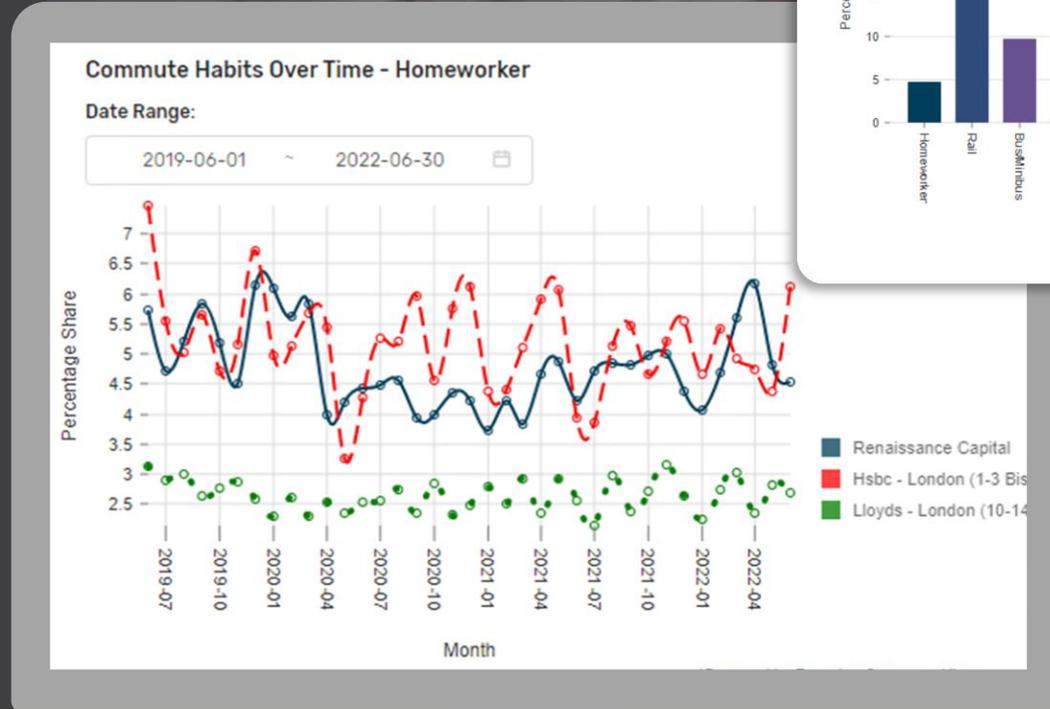

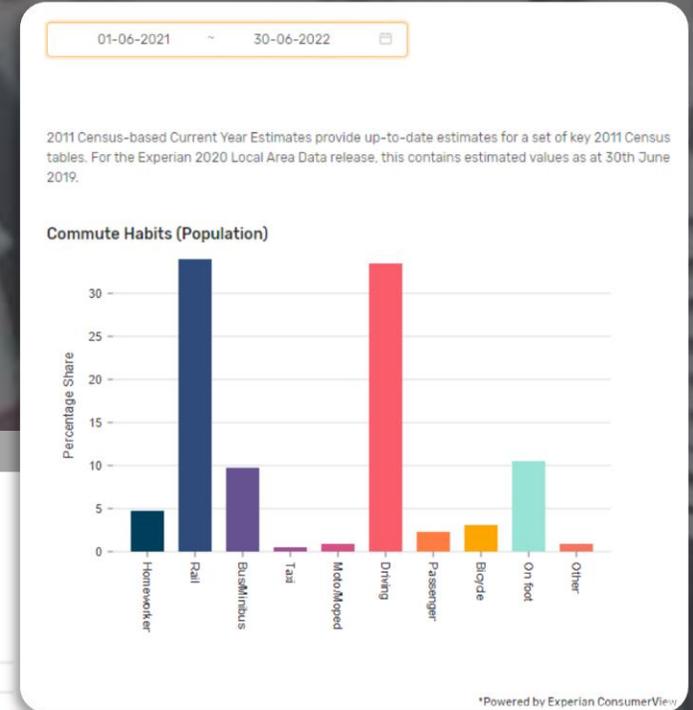

## Age

- Population and Household Estimates provide mid-year 2020 (30th June 2020) estimates of households and populations.
- Population estimates are also split by age, gender and residence type (i.e. residents in households, communal residents).
- Female** age – Individual charts to compare female age differences
- Male** age – Individual charts to compare male age differences

## Commute habits

- Identify patterns for visitors commuting to sites.
- 2011 Census-based Current Year Estimates provide up-to-date estimates for a set of key 2011 Census tables. For the Experian 2020 Local Area Data release, this contains estimated values as of 30th June 2019.
- Compare commuting patterns and work from home data, with competing locations and sites.

# METRICS

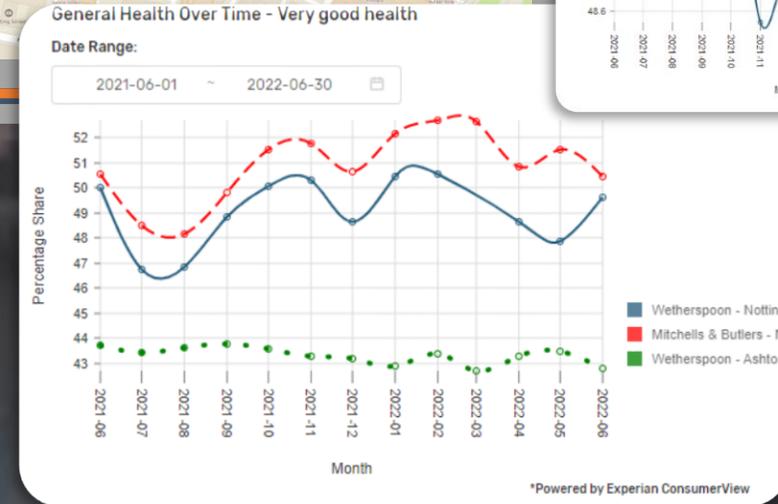

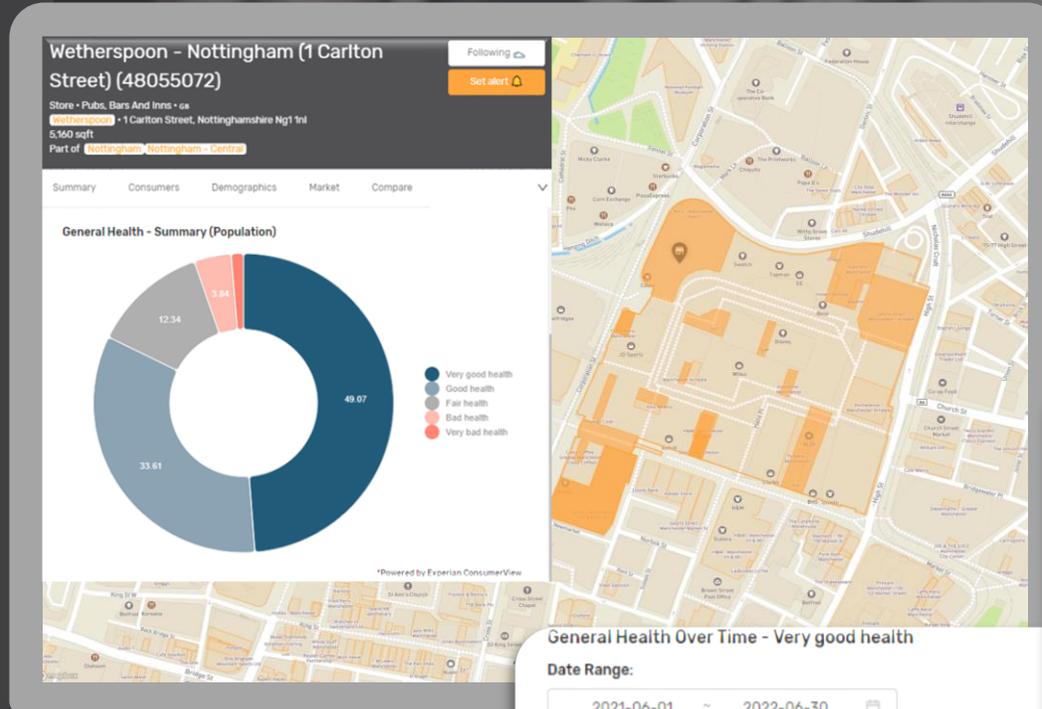

## Demographics – Gender & Health

### Gender

- Shows the distribution of gender frequenting the area.
- Population and Household Estimates provide mid-year 2020 (30th June 2020) estimates of households and populations (i.e. residents).

### Health

- Shows the health of the people populating the site at certain times.
- Can therefore understand why they are there, as well as their lifestyle choices and what they may be more inclined to buy or do.

# METRICS

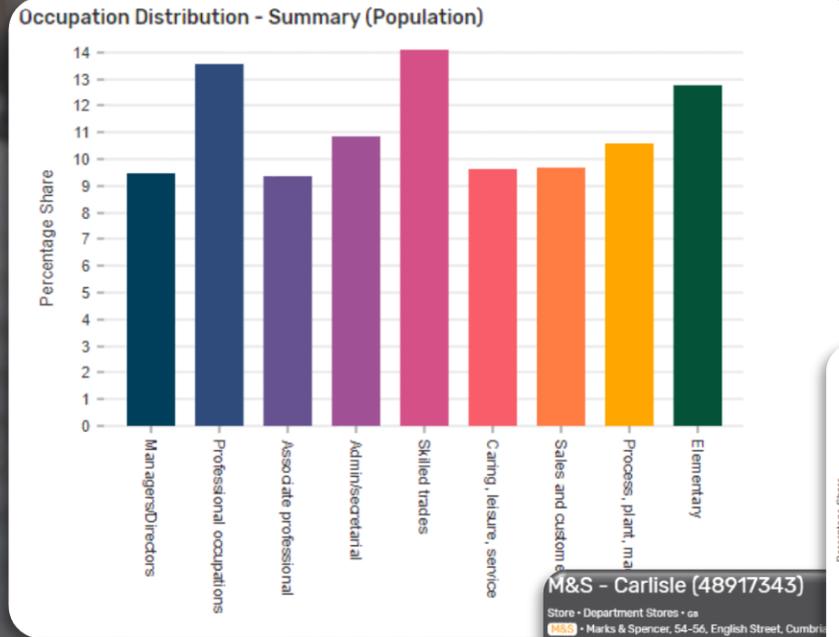

## Demographics – Occupation

### Qualification level

- Insight into the educational achievement of your visitors
- Can compare it to your competitors to find your target audience

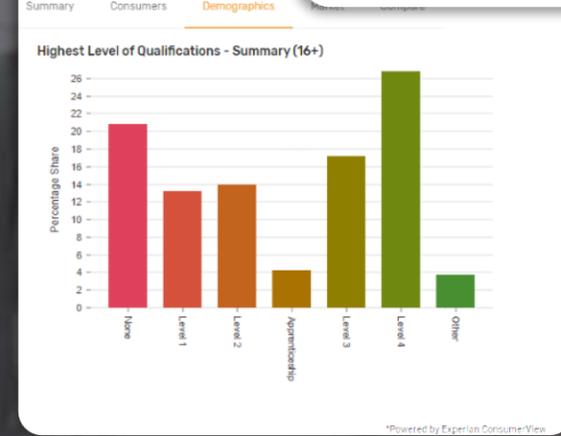

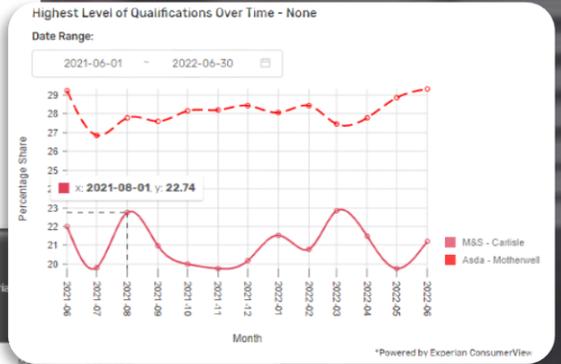

### Occupation

- Charts that can show the distribution of occupations associated with visitors
- Differing time series can be used to investigate when certain professions enter an area

### M&S - Carlisle (48917343)
